- Graduation in Electronics and Communication Engineering, INDIA

INTERESTS

- Gardening
- Arts and Crafts
- Long walks
- Cycling
- Badminton
- Board games

PROFILE

I'm an aspiring software developer trained in Full Stack Development at the School of Code. I'm passionate about coding and logical reasoning, along with my previous business problem-solving and creativity skills. I can bring my essential skills forward and continue my learning journey in building a more empowering web for everyone. I'm ready to join a mission-driven team as a collaborative and creative problem-solver.

WORK EXPERIENCE

School of Code   FEB 2024- PRESENT
Full stack software development

- Planning: Incorporated git merging strategies to avoid git conflicts. Detailed assessment and breakdown of the problem into tickets to ensure clarity and direction for the team.
- Growth Mindset: Exposed to new tech stack and frameworks continuously and applied them using daily workshops, hackathons, and team full-stack projects.
- Problem-solving: Routinely practised breaking problems down into small, manageable pieces of information and collaborated with others to obtain different perspectives and come to solutions effectively.
- Pair-programming: Liaised with a new pair weekly in a navigator/driver manner to solve a problem and share knowledge.

SriSaivinArts   2017-2024
Owner and Founder

- After being a full-time stay-at-home mom for seven years and raising my two lovely young kids, I focused on my interest in arts and crafts to start my e-commerce Indian handicrafts business.
- Designed and communicated with artisans to get the final handicraft product, with customer satisfaction as the highest priority.
- Problem-solving, creativity, marketing, photography, listings, prompt communication on customer complaints, agile methodology practices.

Sixth Energy Technologies Pvt Ltd   Nov 2008-2010
Software Developer

- I was involved in designing and developing a remote Integrated Energy Management System.
- The Neureol Smart Sense system monitors passive infrastructure equipment, detects abnormal behaviour, and generates alerts to avoid downtime and business loss.
- The remote Smart sense system is designed in HTML5, CSS, PHP and MySQL to update sensor data.
